ANNUAL ADMINISTRATION

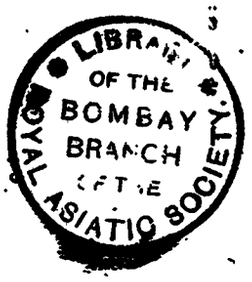
AND

PROGRESS REPORT

ON THE

LUNATIC ASYLUMS IN THE BOMBAY PRESIDENCY

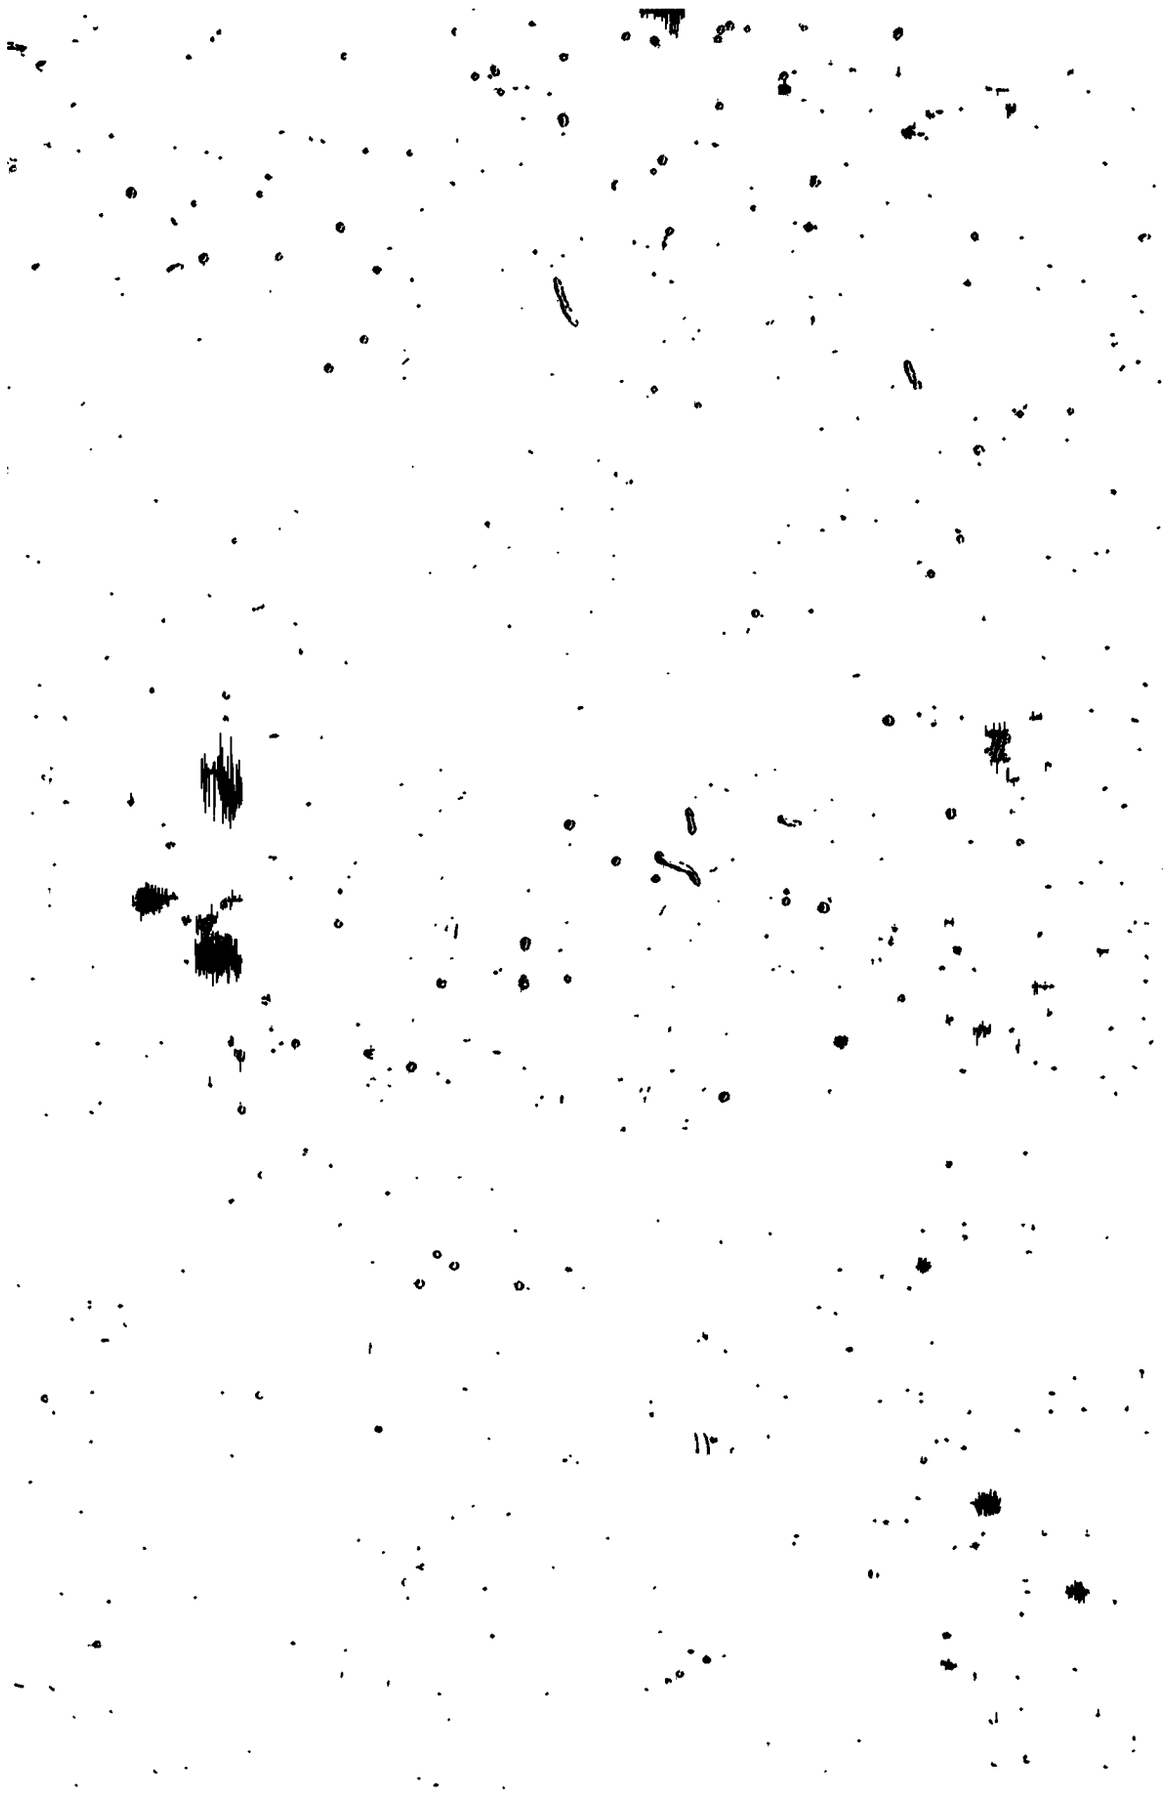
FOR THE YEAR 1893.



A.P.4-35

Bombay:
PRINTED AT THE GOVERNMENT CENTRAL PRESS.

1894.



No. $\frac{S.\ B.}{89}$ OF 1894.

FROM

THE SURGEON GENERAL WITH THE GOVERNMENT OF BOMBAY;

To

THE CHIEF SECRETARY TO GOVERNMENT,
General Department,
Bombay.

Bombay, 9th April 1894.

SIR,

I have the honour to submit, for the information of Government, my administration report on the lunatic asylums for 1893.

2. The buildings have been kept in good repair during the year.

3. At Poona the iron bars of the windows were strengthened at a cost of Rs. 176, and I sanctioned Rs. 481 from my discretionary grant to convert the main ward, of the old civil hospital, hitherto left unused, into a barrack for the accommodation of lunatics. This work has since the close of the year been completed and there is now excellent accommodation for 22 additional patients provided at a very small cost.

4. At Dhárwár the extra accommodation for 35 lunatics sanctioned in 1891 was practically completed in 1892, but has not yet been handed over by the Public Works Department owing to delay in deciding on the plans of the latrines. These plans were sanctioned in Government Resolution No. 466 C. W.—2009 of 2nd December 1893, and it is hoped that the whole will soon be handed over and the extra accommodation, which is greatly needed, made available. I sanctioned Rs. 799 from my discretionary grant for paving the two night wards at this asylum with patent stone, and this will soon be completed.

5. At Ratnágiri the Deputy Superintendent's quarters were converted into a barrack during the year under report.

6. The water-supply was good and abundant, though not sufficient for gardening purposes, at all the asylums. The Municipality at Ratnágiri has not yet been able to supply the quantity sanctioned in Government Resolution No. 156 C. W.—623, dated 29th March 1839, Public Works Department.

7. The grants for the amusement of patients have been carefully expended by the Superintendents on music, mural decorations, purchase of newspapers, books, games and sweetmeats for the patients. These amusements and indulgences appear to be much appreciated by the inmates and I doubt not have a good effect in brightening the existence of the inmates.

8. During the year, and as shown above, the following amounts were given from my discretionary grant for minor works :—Rs. 176 for strengthening the iron bars at the Poona Asylum, Rs. 481 for the conversion of the old Civil Hospital, Poona, into additional accommodation for 22 lunatics and Rs. 799 at Dhárwár for paving the night wards with patent stone.

9. The forms revised by the Government of India as per their Resolution in the Home Department (Medical), No. $\frac{8\ \text{Medical}}{392}$, dated 13th July 1893, received under Bombay Government Resolution No. 2636, dated the 31st idem, General Department, have been adopted in the preparation of the statements attached to this report, and I beg to make the following general remarks on the tables :—

10. Statement No. I shows that during the year under report there were 988 insanes or 11 less than in the previous year. Of these, 800 were males and

188 females against 817 and 162 respectively in 1892. On 1st January 1893 there remained 583 males and 130 females; 194 males and 55 females were admitted and 23 males and 3 females re-admitted; 153 males and 25 females were discharged, of whom 63 males and 13 females were cured, 86 males and 12 females were transferred to the care of friends (62 males and 5 females improved and 24 males and 7 females not improved), and 4 males escaped. 62 males and 15 females died against 80 and 32 respectively in the previous year. At the end of the year there remained 585 males and 148 females under treatment. The daily average strength was 577·5 males and 138·6 females—total 716·1 as compared with 737·8 in 1892.

The percentages of cures and deaths to the daily average strength were :—

Cured	Males	10·9	Total	...10·6
	Females...	9·4		
Died	Males	10·7	Total	...10·8
	Females...	10·8		

The percentages to admissions were :—

Cured	Males	29·0	Total	...27·6
	Females...	22·4		
Died	Males	28·6	Total	...28·0
	Females...	25·9		

Statement No. II gives details of criminal lunatics. At the beginning of the year there remained 97 males and 8 females, while 23 males and 4 females were admitted and 1 male was re-admitted, giving a total of 121 males and 12 females—a grand total of 133 as compared with 130 in the previous year. Of these 7 males and 2 females were discharged, transferred, &c. and 11 males died, leaving 103 males and 10 females on 31st December 1893. The daily average strength of these insanes was 97·3 males and 9·2 females—total 106·5 against 102·4 in 1892.

Particulars of the different kinds of these insanes are given in the following table as ordered in paragraph 4 of the Government of India resolution above quoted :—

Kind of Criminal Lunatics.	Colába.	Ratnágiri.	Poona.	Dhárwár.	Ahmedabad.	Hyderabad.	Total
Those tried and acquitted on the ground of insanity ..	16	...	...	1	4	2	23
Those insane on admission and found to be incapable of making a defence ..	46	23	...	5	9	13	96
Those who became insane during imprisonment	5	1	1	3	1	3	14
Total ...	67	24	1	9	14	18	133

Statement No. III indicates the religion, sex and residence of the lunatics admitted during the year. The total number of Christians admitted was 56. Of these, 49 were Europeans and Eurasians and 7 Native Christians. The majority of the Europeans were soldiers. Hindus numbered 118, Mahomedans 70 and other castes 31.

Statement No. IV gives the previous occupations of the insanes admitted during the year under review. Beggars and mendicants furnished as usual the largest number of admissions, *viz.* 47. Cultivators and labourers numbered 37, military soldiers 33, merchants and traders 16, domestic servants 14 and clerks 12. In 38 cases the occupation was not ascertained and 21 had no occupation.

Statement No. V shows the ages of the lunatics admitted according to sex. There were 11 insanes under the age of 20, 213 between 20 and 40, 46 between 40 and 60, and 5 above 60 years of age.

Statement No. VI gives the details of the various types of insanity, and the following table shows the types of insanity with the result of the treatment of each form :—

	Remained.	Admitted.	Total.	Recovered.	Improved.	Died.
Mania	273	118	391	31	24	29
Melancholia	66	64	130	9	15	9
Dementia	143	35	178	9	13	18
Idiocy	34	6	40	...	1	3
Epileptic insanity	26	5	31	...	1	4
Charas smoking	7	1	8	1	1	1
Gánja smoking	82	26	108	14	6	3
Use of bháng	31	4	35	3	2	4
Opium eating	7	1	8	...	...	3
Spirit drinking	32	10	42	6	4	3
Other types	12	5	17	3	...	...
Total ...	713	275	988	76	67	77

Statement No. VII gives the alleged causes of insanity among the lunatics. Of the 988 insanes confined in the asylums the cause was known in a little more than half the number (509 being known and 479 unknown causes). Of the known causes 423 are attributed to physical and 86 to moral causes. Of the former, 201 are attributed to the use of intoxicating drugs and abuse of spirits, 41 to hereditary causes, 36 previous attacks, 28 to epilepsy, 25 to destitution, 21 to congenital disease, 22 to fever, 10 each to sunstroke and masturbation, 5 to injury to head, 4 each to sexual excess and childbirth, 3 each to syphilis, phthisis and climate, 2 each to uterine disorder, old age and paralysis, and 1 to concussion of the brain. Of the moral causes grief is the chief, 52 cases having been assigned to it, while anger is the alleged cause in 12 cases, religion in 8, fear in 5, jealousy and anxiety in 3 each, loss of money in 2 and study in 1. The following are the causes, as far as they can be ascertained, leading to insanity in persons confined for violent crimes :—

Gánja smoking	... 10	Hereditary	... 3
Opium eating	... 1	Congenital	... 2
Charas smoking	... 1	Grief ...	... 3
Spirit drinking	... 2	Religion	... 1
Fever ...	... 2	Jealousy	... 1
Peurperal fever	... 1	Anxiety	... 1
Epilepsy	... 3	Anger ...	... 1
Injury to head	... 1	Loss of money	... 1

Unknown ... 39

Statement No. VIII is a return of sick treated in the asylum hospitals for diseases other than insanity. On the 1st January 1893 there remained 45 patients under treatment, 305 were admitted, giving a total of 350, or 177 less than in the previous year. Of these, 220 were discharged cured, 9 transferred to the care of friends, 1 deported to Europe, 1 relieved and 77 died, leaving 42 under treatment on 31st December 1893. The daily average sick was 67·4 as compared with 58·0 in 1892. Ague, debility, dysentery, diarrhœa, chronic pneumonic phthisis, paralysis, pneumonia, epilepsy, bronchitis, spasmodic asthma, remittent fever, abscess, ulcer and dropsy were the chief causes of admissions. Of the 77 deaths, 15 were due to dysentery, 11 each to debility and chronic pneumonic phthisis, 6 to old age, 5 each to epilepsy and pneumonia, 4 each to anœmia and diarrhœa, 3 each to remittent fever and paralysis, 2 each to dropsy and Bright's disease, and 1 each to tubercle of lungs, apoplexy, paraplegia, paralysis of insane, fatty degeneration of heart and cirrhosis of the liver.

The following table gives the ratio of deaths per mille to the average daily strength and the total population of each of the asylums as compared with that of the preceding year :—

		Average daily strength.	Total population.	Number of deaths.	Ratio of deaths per mille to	
					Average daily strength.	Total population
Colába	1892	300·0	443	49	163·3	110·6
	1893	285·5	452	44	154·1	97·3
Ratnágiri	1892	81·9	98	7	85·5	71·4
	1893	84·7	99	2	23·6	20·2
Poona	1892	94·0	133	19	202·1	142·9
	1893	96·0	138	13	135·4	94·2
Dhárwár	1892	35·5	42	2	56·3	47·6
	1893	36·0	43	...	...	...
Ahmedabad	1892	104·8	122	8	76·3	65·6
	1893	105·9	116	2	18·9	17·2
Sir Cowasji Jehangir, Hyderabad.	1892	121·6	161	27	222·0	167·7
	1893	108·0	140	16	148·1	114·3
Total	1892	737·8	999	112	151·8	112·1
	1893	716·1	988	77	107·5	77·9

From the above it will be seen that the death-rate was everywhere much less during the year under review than in the year 1892. At Colába about one-third of the deaths occurred amongst the native patients who were committed to the asylum under Section IV of the Lunacy Act and who were either exhausted by privations or suffering from grave bodily ailments prior to admissions to the asylum, rendering successful treatment almost impossible. Others had been long resident in this institution and their mental and physical state being much reduced they succumbed to the prevailing diseases, *viz.*, dysentery, debility, ague, chronic pneumonic phthisis and diarrhœa. The total number of deaths was 44 (5 less than in the previous year), *viz.*, 4 Europeans and 40 natives. Amongst the Europeans there were 2 cases of chronic pneumonic phthisis, 1 of pneumonia and 1 of old age, giving a ratio of 56·3 per mille compared to 84·5 per mille in the preceding year. Those who died of chronic pneumonic phthisis had been about 10 years in the asylum suffering from chronic dementia. The case of pneumonia was an epileptic insane, both the lungs being affected; the disease ran a very rapid course and terminated fatally in 6 days. The case of old age was a woman of about 84 years of age who died from exhaustion. Amongst the natives the ratio of deaths was 105·0 per mille against 115·6 in 1892. The chief causes of death were dysentery, chronic pneumonic phthisis, old age, paralysis and epilepsy.

At Ratnágiri the mortality was very small, only 2 deaths having occurred, 1 from tubercle of lungs and 1 from paralysis of the insane against 7 in the previous year, giving a ratio of 20·2 per mille compared to 71·4 per mille of the year 1892. At Poona there were 13 deaths showing a decrease of 6 over the previous year. The causes were debility 6 cases, anœmia 2, and old age, remittent fever, paraplegia, diarrhœa and Bright's disease 1 each. Of the 7 deaths ascribed to debility and old age several occurred in patients who had been in the asylum for many years. The death-rate per mille was 94·2 during the year as compared with 142·9 per mille in 1892. At Ahmedabad also the mortality was very low, there being 2 deaths against 8 in the preceding year. Both the fatal cases were in a bad state of health when admitted to the asylum. The ratio of deaths per mille was 17·2 against 65·6 in 1892. The Cowasji Jehangir Lunatic Asylum at Hyderabad shows also a decrease in the number of deaths as compared with the previous year, 16 against 27—especially so, considering the fact that the last cold season from November 1892 to February 1893 was very

unhealthy owing to the high inundation of the river Indus. The causes of mortality were debility 4, pneumonia and diarrhœa 3, each, remittent fever and epilepsy 2 each and cirrhosis of the liver and anœmia 1 each. Of the 16 deaths 9 occurred in the months of January and February 1893. The ratio of deaths per mille was 114·3 compared to 167·7 of the preceding year.

Statement No. IX is the cash account of the asylums for the year under report. The total income amounted to Rs. 1,38,394-7-2. Of this, Rs. 1,07,257-9-1 were received from the treasury, Rs. 14,023-3-6 from paying patients, Rs. 8,869-13-3 from the manufacturing department, Rs. 8,218-6-6 were "book receipts" on account of Europe medicines, forms and stationery and work done by the Public Works Department, and Rs. 25-6-10 were miscellaneous receipts. The total expenditure was the same as the income. The cost of establishment was Rs. 45,929-10-3 as compared with Rs. 44,073-4-4 in 1892, the increase being due to the payment of the exchange compensation allowance to the Superintendent of the Colába Lunatic Asylum, being a Surgeon-Major, throughout the year. Rs. 49,849-10-4 were expended on diets, or Rs. 1,596-5-9 less than in the previous year, notwithstanding the fact that the diet scale sanctioned for the Sir Cowasji Jehangir Asylum at Hyderabad in Government Resolution No. 2077, dated 10th June 1891, General Department, which is now in use, costs more than the former scale. Clothing and bedding cost Rs. 5,378-14-3, the increase of Rs. 1,360-7-4 over the previous year being attributed to the increased number of European and paying patients in the Colába Lunatic Asylum and to the extra supply of clothing to the lunatics in the Sir Cowasji Jehangir Lunatic Asylum at Hyderabad as per Government Resolution No. 317, dated 30th January 1893, General Department.

There is an increase of Rs. 155-6-6 in the cost of medicines while contingences show a decrease of Rs. 1,136-5-2 over the preceding year. The following is the abstract of cash account required by the Government of India:—

	Daily average strength in 1893.	Establishment.		Diet.		Clothing and Bedding.	
		Total cost.	Cost per head of average strength.	Total cost.	Cost per head of average strength.	Total cost.	Cost per head of average strength.

If the amounts of Rs. 14,023-3-6 received from paying patients, Rs. 1,737-9-2 on account of sale of manufactured goods and labour on trees, and Rs. 25-6-10 the sale-proceeds of unserviceable stores and refund of bhâta, remitted into the Treasury, Rs. 902-9-1 on account of manufactured goods made over to asylums for asylum purposes, and Rs. 6,229-11-0 the estimated value of the labour of inmates as supplementary servants of the asylums be deducted from the amounts

received from the treasury and adjusted to Government as "book charges", the net cost to Government will be Rs. 84,339-1-6, and the net cost per patient Rs. 117-12-5.

The comparison of these figures with those of the previous year cannot be made, as the estimated value of the labour of the insanes as supplementary servants of the asylums was omitted from the report of the previous year.

Statement No. X shows the sanctioned establishment as it stood on 31st December 1893. The monthly cost was Rs. 3,761-8-0 as compared with Rs. 3,742-8-0 in 1892, the increase being due to the entertainment of an additional sweeper at the Sir Cowasji Jehangir Lunatic Asylum, Hyderabad, and to the increased rate of pay to the male warders and a barber of the Ratnágiri Asylum.

Statement No. XI gives receipts and expenditure of the manufacturing department. The average number of insanes employed during the year was 252·0 males and 52·4 females—total 304·4 as compared with 292·3 in the preceding year. The total credits amounted to Rs. 9,688-8-0 and debits to Rs. 2,002-3-0, giving a profit of Rs. 7,686-5-0.

Statement No. XII gives the condition of the insanes as to caste, sex and marriage, and is summarized in the following tables :—

TABLE I.

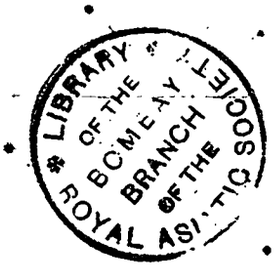
Statement No. XIII shows the particulars regarding criminal insanes. The nature of the crimes were theft 29, culpable homicide amounting to murder 47, culpable homicide not amounting to murder 5, attempted suicide 2, grievous hurt 13, house-breaking 6, mischief and assault 12 and miscellaneous offences 19.

11. The official visitors were regular in their attendance at all the asylums except Colába, where in March the 2nd Presidency Magistrate, in April and in August the Superintendent, House of Correction, and in December the Commandant of the Marine Battalion were unavoidably absent. None of these visitors however provided substitutes in accordance with the standing order embodied in Government Resolution No. 104, dated 12th January 1874.

12. All the asylums were inspected during the past travelling season, the Cowasji Jehangir Lunatic Asylum, Hyderabad, by Surgeon-Colonel Bowman, and those of Colába, Poona, Dhárwár, Ratnágiri and Ahmedabad by myself, and though far from perfect structurally they were found in as good a condition as was possible under the circumstances.

The Superintendents have all performed their duties to my satisfaction.

I have the honour to be,
Sir,
Your most obedient Servant,
P. S. TURNBULL, M.D.,
Surg.-Major-Genl.,
Surgeon-General with the Government of Bombay.



ANNUAL STATEMENT No. 1.

Showing separately the Admissions, Discharges, &c., &c., of Lunatics in the Lunatic Asylums in the Bombay Presidency during the year 1893 and ten previous years.
